👤 About Me

Passionate Full Stack Developer with hands-on experience in building responsive and user-friendly web applications. Skilled in both frontend and backend development with a strong understanding of JavaScript, REST APIs, and database management. Experienced in developing real-world projects like task management and restaurant websites, focusing on clean code, performance, and scalability. Eager to learn new technologies and contribute to impactful products.

🔍 projects

🍽️ **Project 1 : DineEasy Website (Restaurant / Food Platform)**
DineEasy – Restaurant Website | Full Stack / Frontend Developer
Tech Stack: HTML, CSS, JavaScript, (Add backend tech if used)
Description:
- Developed a restaurant/food ordering website with modern UI and smooth user experience.
- Designed multiple pages including Home, Menu, Booking, Contact, Login/Signup.
- Implemented interactive components and animations to enhance user engagement.
- Integrated user authentication and LocalStorage-based data handling.
- Focused on mobile-first responsive design.

Key Features:
- Food menu listing
- Table / order booking system
- Login & Signup functionality
- Animated UI & smooth navigation
- Responsive layout for all devices

🚀 **Project 2 : Todo App**
Todo App | Frontend Developer
Tech Stack: HTML, CSS, JavaScript, LocalStorage
Description (2–3 strong points):
- Designed and developed a fully functional Todo application to manage daily tasks efficiently.
- Implemented CRUD operations (Add, Edit, Delete, Complete tasks) using JavaScript.
- Used LocalStorage to persist user data across browser sessions.
- Built a clean and responsive UI for better user experience.
- Focused on code readability and performance optimization.
